NRO REVIEW COMPLETED

26 April 1961

MEMORANDUM FOR : Chief, Technical Intelligence Services Division, NPIC  
SUBJECT : Exploitation Equipment for Project MURAL

25X1A

1. Yesterday we briefly discussed some problem areas that will result from the "M" material being acquired by a high acuity, stereo, convergent system.

2. Today, I received the attached letter from [redacted] touching on the same subject. The last sentence of his letter is really directed to you, therefore, I am forwarding this problem area for your comments.

3. Current plans call for an experimental "M" mission the first part of next year. The lead time is fairly short if you need to develop specialized equipments and techniques.
